

The Retractable Lighting Company

Now everyone can enjoy floodlit play with the unique retractable lighting system.

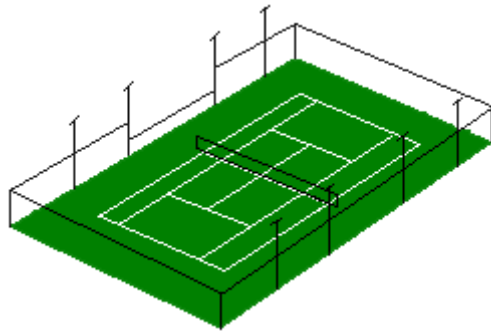

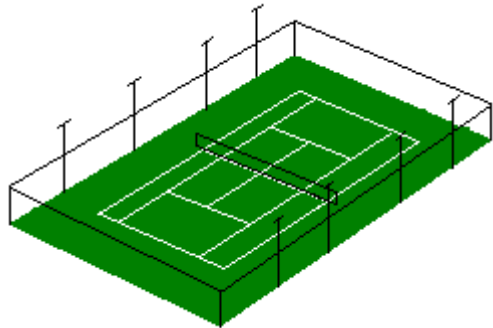

- Simple telescopic action
- Even spread of light without glare
- Maintenance free, all weather construction
- Retractable and unobtrusive
- Unaffected by high winds
- Tailor made system
- Installed with no disruption to the court

- We now use metal halide lights that are brighter, whiter and much cheaper to run
- A new handle design makes the lights easier to raise and lower and is much safer

We design each lighting system to suit your needs – the top illustration is a typical layout, the one below would accommodate a break in the perimeter fencing.

Lighting units are shown in the raised position.
